Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Request for Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.
2. Amendment B, Paper 16, received on March 2, 2004 has been entered into record.
3. Claims 1,3-21, and 23-30, and 38-39 remain pending.

Response to Amendment

4. This office action is in response to the amendment filed on. Amendment filed on March 2, 2004 have been entered and made of record.
5. This office action is in response to the applicants Amendment filed March 2, 2004 (Paper No. 16). Previous office action contained claims 1,3-21, and 23-30. Applicant amended claims 1,12-14, and 20, and added claims 38-39. Claims 1,3-21, and 23-30, and 38-39 are presented for further consideration and examination.
6. Applicant's arguments with respect to claims 1, and 20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 1,3-7,10,12-21,23-26,29-30, and 38-39 is rejected under 35 U.S.C. 102(e) as being anticipated by Forman et al. U.S. Patent 6,178,449.

9. Referring to claims 1, and 20, Forman reference discloses sending a request for information to the information source (Figure 4, servers 410,420, and 430) from a data acquisition agent (Figure 4, client transaction time agent (460) connected to the network (Abstract; Figure 4; col. 3, lines 19-22); loading data responsive to the request for information onto the data acquisition agent from the information source (eg. agent collect response time from request send to server; Figures 4, and 5; col. 5, lines 29-31); continuing the transaction between the information source and the data acquisition agent by simulating a transaction previously recorded between a user machine, the user machine not the data acquisition agent, and the

Art Unit: 2143

information source (col. 10, lines 16-35); collecting performance measurements by the data acquisition agent for the transaction (Figure 5; and col. 10, lines 16-19); and sending the performance measurements to a storage device (col. 10, lines 30-35).

10. Referring to claim 3, Forman reference discloses collecting performance measurement comprises collecting download time of the data in response to the request for information (Figure 5).

11. Referring to claims 5, and 26, Forman reference discloses collecting performance measurements comprises identifying errors (eg. Time-out) occurring during the transaction (Figure 5).

12. Referring to claim 6, Forman reference discloses the network is the Internet (col. 5, lines 14-22).

13. Referring to claim 7, Forman reference discloses the information source is a web server and the request for information comprises requesting a web page (client communicates with server via http; col. 5, lines 14-21).

14. Referring to claim 10, Forman reference discloses connecting a data acquisition agent to the network comprises connecting a plurality of data acquisition agents to the network at a plurality of locations (col. 4, lines 59 through col. 5, 1st paragraph).

15. Referring to claims 12, and 13, Forman reference discloses continuing the transaction comprises sending a query from and submitting an order the data acquisition agent to the information source after the data is loaded (eg. transaction agent continue to measure and record of transaction times occurs until the client instance is notifies transaction agent to end) (col. 10, lines 16-28 and 43-48).

Art Unit: 2143

16. Referring to claim 14, Forman reference discloses continuing the transaction comprises updating state information to link web pages together within a transaction (Figure 7).

17. Referring to claims 15, and 16, Forman reference discloses updating state information comprises searching for a session ID, and searching for a text (col. 8, lines 47-64).

18. Referring to claims 17-19, Forman reference discloses updating state information comprises searching for a frame, URL, and HTML text (eg. updating the stats table) (figure 6).

19. Referring to claim 21, Forman reference discloses the data acquisition agent includes a browser embedded within the agent (col. 5, lines 14-21; and col. 8, lines 47-55).

20. Referring to claims 23, and 24, Forman reference discloses the data acquisition agent is configured to receive said recorded transaction over the network, and instructions specifying a plurality of said recorded transactions to execute (Figure 7; and col. 10, lines 16-61).

21. Referring to claim 25, Forman reference discloses the data acquisition agent is configured to repeat execution of said specified transactions until new instructions are received (col. 9, lines 32-38)

22. Referring claims 29, and 30, Forman reference discloses a monitoring device for recording when the agent last executed the transaction, and the agent is operable to store the collected performance measurements (col. 10, lines 30-35).

23. Referring to claims 38, and 39, Forman reference discloses connecting the data acquisition agent to the network, and the data acquisition agent interacts with the information source with a browser (Figure 4; and col. 5, lines 14-21, and col. 8, lines 47-55).

Claim Rejections - 35 USC § 103

24. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

25. Claims 8-9,11, and 27-28 rejected under 35 U.S.C. 103(a) as being unpatentable over Forman et al. in view of Killian U.S. Patent 6,438,592.

26. Referring to claims 8,9,11,27, and 28, Forman reference disclose the information source is a web server and the request for information comprises requesting a web page. However, Forman fail to teach the collecting performance measurements comprises collecting download time for each web page and individual components within each of the web pages downloaded during the transaction, and displaying the performance measurements on a web site.

Killian reference discloses the collecting performance measurements comprises collecting download time for each web page and individual components within each of the web pages downloaded during the transaction, and displaying the performance measurements on a web site (col. 3, lines 47-63; and col. 9, lines 12-35).

It would have been obvious to one of the ordinary skill in the art at the time of the invention was made to incorporate Killian's teaching into Forman's method to collect download time for each web page and individual components within each web page, and displaying the

Art Unit: 2143

performance measurements on a web site, so the user can determine how much of a web page's slow download time is caused by which component objects, and locate such performance problem quicker.

Conclusion

27. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
